## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Response to Arguments*

Applicant's arguments with respect to claims 1 and 3-5 have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lippiatt. The interference fit is obvious in view of the valve member second portion (the non-referenced member that the spring 39 upper end engages) that sealingly engages the bore within the first valve member portion 26. Element 33 is readable on the check valve member, element 39 is readable on the biasing member and the follower is the lower end of the second member and the lower shoulder portion of the check valve 33.

Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lippiatt, as applied in the above rejection of claim 1, further in view of Oberthur. The above claims are readable on the patent to Lippiatt with the single exception of having a brake type valve member made out of non-metallic material. The patent to Oberthur teaches the above exception. In view of the teaching of Oberthur, it would be obvious to one of ordinary skill in the art, at the time the invention was made, to make the valve member of Lippiatt out of elastomeric or non-metallic material as taught by elements 204-206, if desired. Claim 5 is a matter of design choice in view of the teaching of Lippiatt. Such teaching provides no unobvious or unexpected result.

#### ***Allowable Subject Matter***

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 6-11 are allowed

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
